

Quizlet

quizlet.com

"A lightning fast way to learn vocabulary."

Quizlet is an online program that allows you to create vocabulary cards with text and pictures for any set of words, and then to create additional activities, such as games and tests, based on your cards. It has "text-to-speech" built in so that learners can hear the words spoken aloud.

Chana Lapid prepared these five sets of vocabulary flashcards:

Vocabulary flashcards on Quizlet: Automated, interactive cards with the word on one side, picture/Hebrew meaning on the flip side, practice words that were introduced in the 50 levels of The English Club (books and app that follow the Hickey Method through Level 39).

There are five sets, for practice at the end of each ten lessons. Many of the words are in Band 1, the list of basic vocabulary for English learners prescribed by the English Inspectorate of the Israeli Ministry of Education.

After they review the cards, learners can practice hearing, spelling, and meaning using Quizlet's games and activities. Copy this URL into your browser:

Hagit Lahav sent this suggestion and links:

I create tests for my Quizlet sets, with question types that the student likes. You can generate them per request.

Here I made two tests for the first twenty Hickey lessons using the sets that Chana made (above) . My student likes multiple choice questions. I defined it so that all the words on the set would be included.

Once you open them on a mobile device , you can open the test via the app, which makes it really nice, engaging and inviting. Try it!
